

## Purivox Airport bird control devices Gas cylinder information

### Devices:

Purivox TA-RC System  
Purivox DA-RC System  
Purivox VA-RC System

### Gas type:

Propane (LPG)

### Gas cylinder type:

Propane cylinder for the use on LPG-Forklifts

### Gas cylinder position

Horizontal. Gas cylinder valve shows towards the sky

### Gas cylinder dimension:

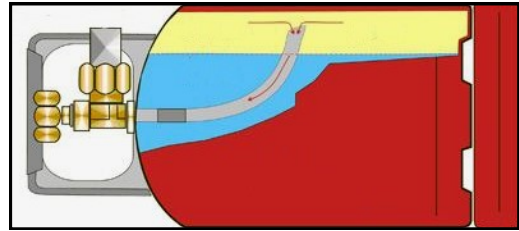

Max. diameter - 330mm  
Max. length - 600mm

### Shots/Liter

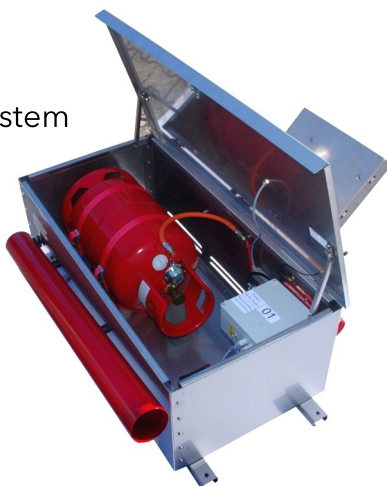

Around 640 operations / 1 liter (1x operation means all three blast tubes will fire once)

### Why can normal gas cylinder not be used?

The Purivox airport bird control devices should be as low as possible. This only can be done by using the horizontal gas cylinder. Due the position of the towards the sky, the gas cylinder released only gas and not liquid gas.
